Name : Muhammad waqas

Section: BCE-4A

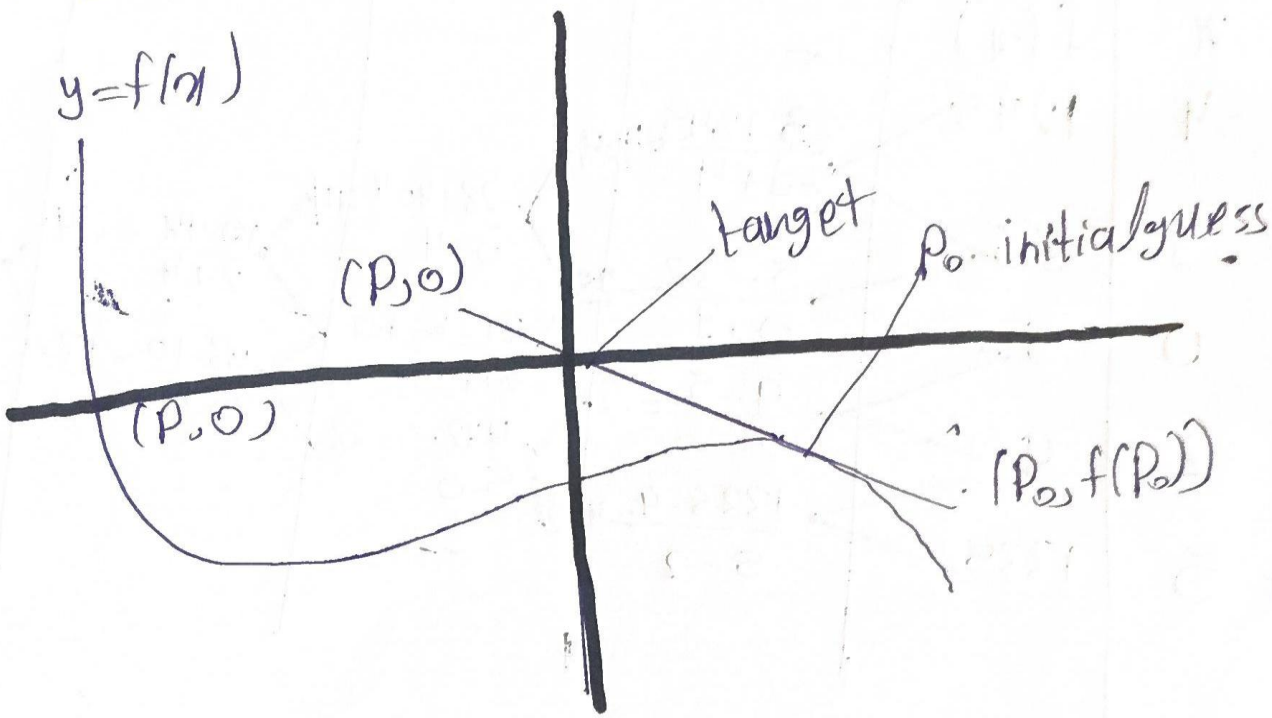

Class Task

Submitted to Sir Waleed Akmal

Subject: Numerical Analysis

Newton Derivation

Graph shows that P_1 will be closes to p. then P_0 Equation relating P_1 and P_0 can be found At we write down to versions for slope of tanget line L

representing an equation.

$$m = \frac{y_2 - y_1}{x_2 - x_1} = \frac{f(P_0) - 0}{P_0 - P}$$

$$m = f'(P_0)$$

$$m = f'(P_0) = \frac{f(P_0)}{P_0 - P_1}$$

$$P_0 - P_1 = \frac{f(P_0)}{f'(P_0)}$$

$$P_1 = P_0 - \frac{f(P_0)}{f'(P_0)}$$
